

Rotor Rooter: Rooting Autorotational Success at HELI EXPO 2014

Analysis reveals that approximately 18% of all helicopter accidents occur during training, while a large portion of these accidents occur during autorotation training. The Rotor Rooter-Acronym Series provides pilots with user friendly acronyms to help them systematically identify, quantify, and mitigate certain risk factors associated with autorotations. These memory aids can help pilots remember critical factors, while also emphasizing the importance of utilizing systematic procedures for defending against risk factors inherent with autorotation training.

Directions: 304C

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

Event Details

Thu, Apr 10, 2014 - 8:30 am
Anaheim Convention Center
00 W Katella Ave
Anaheim, CA 92802
